Adlee Afif

PROFILE

Highly motivated software engineering student with experience in diverse MVC architecture projects and proficiency in various programming languages. A fast learner with a genuine passion for coding, eager to contribute innovative solutions and make a positive impact in the field of technology.

EXPERIENCES

Versa Asia Sdn. Bhd.   **2023**
Developer Intern

- Contributed to the development of system and API layers for various services, ensuring efficient and scalable solutions.
- Successfully decoupled a module from its existing framework and integrated it into different frameworks, enhancing the module's reusability and flexibility.
- Learnt and hands-on experience in performing Continuous Integration and Continuous Deployment (CI/CD) practices, streamlining the software delivery pipeline.
- Designed and implemented a data pipeline to ingest data from NoSQL databases to SQL databases, improving data processing and analysis capabilities.
- Worked in a Sprint/Agile environment, actively participating in iterative development processes to deliver high-quality software solutions efficiently.

PROJECTS

Personal Portfolio | 2023 - Present
Developing my own personal portfolio to get people know me better using ReactJS together with Node.js as well as other open source libraries.

WeatherEye | 2022 - 2023
WeatherEye is a weather monitoring system that provides real-time parameters to the user and forecast the upcoming weather parameters.

EDUCATION

Universiti Malaysia Pahang

2019 - 2023 | Bachelor of Computer Science (Software Engineering) w/ Hons
CGPA: 3.73

Kelantan Matriculation College

2018 - 2019 | Physical Science Stream
CGPA: 3.25

AWARDS

UMPXHUAWEI Hackathon 2022
Consolation Prize

Dean's List Award
Seven semesters in a row

Persatuan Teknologi Komputer
Deputy Head of Entrepreneurship

TECH. SKILLS

- **Programming Languages:** Java, C, JavaScript, PHP
- **Frameworks:** Node.js, Express,js, Jest,js
- **Databases:** MySQL, BigQuery, Firebase, MongoDB
- **Methodologies:** Agile and Scrum
- **Tools:** VSCode, Android Studio, Git, GitHub, Jira, GCP and Jenkins
